2023 NORTH CAROLINA WALK TO END LUPUS NOW

SPONSORSHIP OPPORTUNITIES

Saturday, October 21, 2023
Charlotte, NC
ORGANIZATIONAL SUMMARY

The mission of the Lupus Foundation of America, North Carolina Chapter (LFANC) is to improve the quality of life for all people affected by lupus through programs of research, education, support and advocacy. We are focused on achieving the following disease-specific outcomes:

- Reduce time to diagnosis
- Ensure people with lupus have an arsenal of safe and effective treatments
- Expand direct services and increase access to treatment and care

THE PROBLEM

Lupus is a chronic autoimmune disease in which the immune system is unbalanced, causing inflammation and tissue damage to virtually any organ in the body. It can be unpredictable and potentially fatal, yet no satisfactory treatment or cure exists.

An estimated 1.5 to 2 million Americans have lupus. There are over 55,000 people living with lupus in the state of North Carolina. Receiving the diagnosis of lupus can be a stressful or frightening moment for both the patient and the family.

OUR IMPACT AND SOLUTION

We have redefined lupus research to expand efforts beyond funding research grants. Our approach is innovative and addresses the root problems that interfere with progress and sets a course to solve them. We focus on three critical goals: identify the causes of lupus, discover better ways to control symptoms and ultimately find pathways to cure lupus. Our lupus "thrivers" are people that are living with the disease.

Our services to North Carolina "thrivers" include:

- Access to educational programs that include pertinent medical, emotional and wellness topics. Many of these educational opportunities are led by medical experts.
- Access to Lupus Foundation of America, North Carolina Chapter emergency funds. Because lupus is a complex disease, it affects people's daily lives. Many are unable work and require assistance with paying for things such as durable medical equipment, utilities, housing, medications and transportation.
- Access to medical professionals that specialize in lupus.
- Access to support groups. It is important for individuals living with the diagnosis of lupus to have peer support. These groups meet monthly across the state of North Carolina and provide participants with companionship.
YOUR IMPACT

As a sponsor of the 2023 North Carolina Walk to End to Lupus Now, you have the opportunity to make a direct impact in the state of North Carolina. The funds raised at this event go directly to supporting "thrivers" throughout the state. As a nonprofit organization, we rely on the generosity of the community to be able to continue vital programming and support for lupus "thrivers".

Lupus widely affects communities of color, specifically African American women. African American women are two to three times more likely to be diagnosed with lupus. Many women affected by lupus live in underserved communities in North Carolina. Your support will assist with providing health equity and access to medical education and professionals for people in this community.

Your support can improve the quality of life for people with lupus through research, education and advocacy. Help us continue to lead the way and have the greatest impact on people’s lives in the shortest amount of time.

Your sponsorship will allow us to:

- Increase the number of educational programs featuring health care professionals for people living with lupus in North Carolina
- Provide increased infrastructure and support for lupus peer support groups
- Provide emergency financial assistance to families affected by lupus
